

Welcome to AOSC i3 Edition!

Cheatsheet

The default mod-key is **<Super>** (Windows-key).
Look&Feel can be changed with **Lxappearance**.
For wallpaper selection use **Nitrogen**.

Most important shortcuts

Open new terminal window - **mod+<Enter>**

Kill focused container - **mod+<Shift>+q**

Open Application Menu (rofi) - **mod+d**

Open dmenu - **mod+Shift+x**

Categorized menu 'morc_menu' - **mod+z**

Tile vertically - **mod+v**

Tile horizontally - **mod+h**

Toggle split direction - **mod+q**

Toggle floating - **mod+<Shift>+Space**

Toggle fullscreen - **mod+f**

Toggle sticky - **mod+<Shift>+s**

Hide/show i3status-bar - **mod+m**

Application Shortcuts

Bmenu (CLI configuration tool) - **mod+Ctrl+b**

Web Browser Firefox - **mod+F2**

Filemanager Pcmnfm - **mod+F3**

Root Filemanager - **mod+<Shift>+F3**

Pavucontrol - **mod+<Ctrl>+m**

System Monitor htop - **mod+F5**

Screenshot of whole screen - **<Print>**

Screenshot of focused container - **mod+<Print>**

Screenshot of selection - **mod+<Shift>+<Print>**

Switch off transparency (kill Compton) - **mod+t**

Switch transparency back on - **mod+<Ctrl>+t**

Restart Dunst - **mod+<Shift>+d**

Xkill - **mod+<Ctrl>+x**

Navigation

Change focus - **mod+arrowkeys** or **mod+j,k,l,ö**

Change focus between tiling / floating windows - **mod+space**

Move focused container - **mod+<Shift>+arrowkeys** or **mod+<Shift>+j,k,l,ö**

Move floating window with the mouse - hold down **mod**

Switch to workspace number 1-8 - **mod+1-8**

Navigate between workspaces - **mod+<Ctrl>+<Right>/<Left>**

Send focused container to workspace number 1-8 - **mod+<Ctrl>+1-8**

Move to workspace 1-8 with focused container - **mod+<Shift>+1-8**

Workspace back-and-forth - **mod+b**

Move container to workspace back-and-forth - **mod+<Shift>+b**

Resize container - **mod+r** followed by arrowkeys or j,k,l,ö (or **mod+<right-click>**)

(Exit resize mode with **<Enter>** or **<Esc>**)

Resize gaps – **mod+<Shift>+g** followed by **o** (outer gaps) / **i** (inner gaps) and **+ / - / 0**
(Exit gaps mode with **<Enter>** or **<Esc>**)
Move focused container to scratchpad – **mod+<Shift>+-**
Show (next) scratchpad window – **mod+-**

Change desktop behaviour

Stacking - **mod+s**
Tabbed - **mod+w**
Tiling / toggle split – **mod+e**

Audio:

The default is **Pavucontrol** with **Volumeicon**. The Volume buttons on your keyboard will work fine as well.

Change window borders (available with i3-gaps)

None – **mod+u**
2-pixels – **mod+y**
Normal – **mod+n**

Reload the configuration file - **mod+<Shift>+c**
Restart i3 in-place - **mod+<Shift>+r** (preserves and reloads your session)

Lock screen - **mod+9**
Exit session - **mod+0** and select:
(l)ock, (e)xit, (s)uspend, switch_(u)ser, (h)ibernate, (r)eboot, (<Shift>+S)hutdown
(cancel with **<Enter>** or **<Esc>**)
or
Exit i3 - **mod+<Shift>+e** (logs you out of your Xsession)

Tweaking

Desktop Widgets Customization

You can disable or enable conky widgets in `~/.config/conky/autoconky.py`. Feel free to modify the `conkyrc` files to meet your needs.

HiDPI Adjustment

The easiest way to change HiDPI settings is to use **gnome-settings-daemon**.
Use ``apt install gnome-settings-daemon`` to install **gnome-settings-daemon**.
And type ``gsettings set org.gnome.desktop.interface scaling-factor 2`` in a terminal

Fcitx Input Method

To make fcitx start at boot, add the following line to `i3config`
``exec --no-startup-id fcitx``

!! All i3 settings can be edited in `~/.config/i3/config` !!

HAVE FUN !
